Professional Summary

Detail-oriented MCA graduate with strong foundation in full-stack development (MERN), Java, and Python. Passionate about building scalable software solutions and solving complex problems. Seeking an entry-level Software Developer role to leverage technical skills in a dynamic team environment.

Technical Skills

- **Languages:** Python, Java, JavaScript, HTML, CSS
- **Frameworks:** React.js, Node.js, Express.js
- **Databases:** MongoDB, MySQL
- **Tools:** Git, GitHub, Visual Studio Code

Projects

CampusFix - Campus Electrical Issue Management System

MERN Stack

- Built full-stack web app for reporting and tracking campus electrical issues
- Implemented JWT authentication, RESTful APIs, and MongoDB integration
- Designed responsive UI in React.js with form validation & toast notifications

SportsInfo - Sports Updates Website

React.js, CSS, REST APIs

- Built frontend for live scores, player stats, and sports updates
- Integrated third-party sports API for real-time match data
- Designed responsive UI with search & filter features

Internship

Full Stack Development Intern - Technical Hub

May 2025 - Jun 2025

- Worked on "CampusFix" in Project Space 7.0, gaining hands-on SDLC experience
- Applied full-stack development methodologies using MERN stack
- Collaborated in team environment with real-world project simulation
